

Please do not allow the use of cellular phones aboard the aircraft!  
I have been a flight attendant for 26 years...besides being annoying to other passengers..."Can you HEAR me now?!" I truly believe there are few places left in this world we can truly disconnect (it can be a good thing!) Traveling is stressful for many people...let's try to minimize the endless chatter that cellphones would bring in a (airborne) aircraft and continue to just allow passengers to use their phones on the airplane while it is on the ground. Thank you!
